CONTENTS

Thermophysical and transport properties of multicomponent gas plasmas at multiple temperatures 1
TARIT K. BOSE

Viscous flows and instabilities near rotating bodies 43
MANFRED WIMMER

Calculation methods for three-dimensional turbulent boundary layers 107
D. A. HUMPHREYS and J. P. F. LINDHOUT

Analytical study of sonic boom from supersonic projectiles 131
J. J. GOTTLIEB and D. V. RITZEL

Vortex breakdown: observations and explanations 189
M. ESCUDIER

Coherent structures in turbulent flows 231
H. E. FIELDER

Passive control of shock–boundary layer interaction 271
S. RAGHUNATHAN

Variable wing camber for transport aircraft 297
J. SZODRUCH and R. HILBIG

Steady, pseudo-steady and unsteady shock wave reflections 329
G. BEN-DOR
